

The City of Raleigh, a municipal corporation organized and operating under the laws of the State of North Carolina, plans to replace PeopleSoft Enterprise Performance Management (EPM) System with Oracle's Planning and Budgeting Cloud Service (PBCS). This Request for Proposal (RFP) is being issued by the Budget and Management Services (BMS) Department and is intended to select a highly qualified vendor to complete the PBCS implementation.

A single application of PBCS with access for 125 users has already been procured. The scope of this project is to provide expert consultation, application development and training services required for a successful PBCS implementation.
